EDUCATION

Muhammad Ali Jinnah University

Bachelor of Computer Science

CGPA: 3.67 · Relevant coursework: Data Structures & Algorithms, OOP, Computer Networks, Database Systems, Software Engineering, DevOps, Security, Cloud

Karachi, Pakistan

Sep 2022 – Jul 2026

D.J. Sindh Govt. Science College

Intermediate (HSC)

Karachi, Pakistan

Sep 2019 – May 2021

WORK EXPERIENCE

10Pearls Pakistan

Software Engineer Intern · Spring Boot · React.js · JWT · REST APIs

Karachi, Pakistan

Dec 2025 – Feb 2026

- Designed and built a secure full-stack Contacts Management System; implemented JWT auth with token blacklisting, role-based access control, and complete CRUD with pagination and debounced search.
- Engineered DTO-based architecture with Axios interceptors for clean data flow, and delivered a responsive React UI with reusable components and automatic session expiry handling.

SKILLS & ACTIVITIES

Backend: Java, Spring Boot, Spring Security, JWT, OAuth2, REST APIs, Maven, Lombok, SonarQube, Postman

Frontend: React.js, Angular,

Databases: MongoDB Atlas, Redis, SSMS (JPA + Hibernate), PostgreSQL

Infrastructure: AWS, Render, CI/CD, GitHub, Heroku, n8n, Linux, Kali Linux, IntelliJ, VS Code

AI & Automation: Google Gemini API, n8n workflow orchestration, Cursor, Claude

Activities: HackerOne CTF 2025 · ACM Futsal Runner-Up 2025 · Intra-University Futsal Winner 2024 & 2023 · MAJU ACM Marketing Team · Student Head (peer teaching) 2024

SELECTED PROJECTS

Aether-Shield – Autonomous AI Self-Healing SRE Agent

n8n · Google Gemini API · GitHub REST API · PostgreSQL · Discord Webhooks

2026

- Architected a closed-loop AI remediation engine that intercepts live service crash webhooks, applies LLM semantic diagnosis via Gemini 2.5 Flash, refactors the faulted code, and pushes a fix commit to GitHub - all autonomously in under 15 seconds.
- Solved ephemeral container data loss by migrating n8n workflow state into an ACID-compliant PostgreSQL layer on Render; implemented exponential backoff to handle upstream Gemini 503 rate-limit errors.
- Engineered inline JavaScript parsing logic to cleanly extract structured patches from deeply nested Gemini response buffers and stream real-time diagnostic reports to a Discord SRE channel.

Trustify – Secure Rental & Marketplace Platform

Spring Boot · MongoDB Atlas · JWT · OAuth2 · Stripe API · Socket.io · Gmail SMTP 2025 — Final Year Project

- Architected the complete backend for a community rental platform covering listings, transaction lifecycle, Stripe escrow payments with controlled fund release, dispute handling, and admin fraud monitoring.
- Built real-time chat via Socket.io, a role-based Admin Panel, and automated cron jobs for reminders, delayed-transaction status updates, and email notifications.

Contacts Management System · 10Pearls Pakistan (Internship Project)

Java · Spring Boot · Spring Security · JWT · React.js · Axios

2025

- Secure full-stack web app with complete CRUD, JWT auth, token blacklisting, DTO-based validation, and responsive React UI — built as core internship deliverable at 10Pearls Pakistan.
